AI Risk Analysis

Summary

Comparative analysis summary

Recommendation

Review

Detailed Rationale

The current application has a similar amount to Case 1, but a higher risk score. This suggests that there may be additional factors at play.

The top risks identified in the current application (customerType, gender, maritalStatus, region, product, and aml_pppe) are not seen in historical cases.

Despite the high risk score, the customer has a good credit history with us.

Key Findings

Recommended Conditions

- If the customer's credit history with us remains good, we may consider approving the application.
- We should also verify the accuracy of the customer's information and ensure that all necessary documentation is provided.
